INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR § 1.97(c)

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

As a means of complying with the duty of disclosure set forth in 37 CFR § 1.53 and in keeping with the guidelines of 37 CFR 1.98, Applicants hereby submit information thought to be relevant to the examination of the above-identified application. Also submitted herewith is a completed form PTO-

1449.

This information was cited in a European search report dated December 23, 2004, and it is hereby certified that this disclosure is being made within three months of that date.

No final office action has been received in this application.

United States Patent Application Publication No. US 2001/0049471 A1, Suzuki et al., relates to a wearable type life support apparatus for measuring and determining various states of a user. Life support is provided by an information service according to the user's situation. The apparatus includes an advertisement providing method.

United States Patent Application Publication No. US 2002/0024450 A1, Townsend et al., relates to a device for sensing, storing and transmitting data. The device can be attached to a structure or live subject for providing data about the structure or live subject.

United States Patent Application Publication No. US 2002/0188214 A1, Mischynski et al., relates to a system and process for analyzing the medical condition of a user and predicting future medical abnormalities. The device includes a portable information-receiver, an information processor and a remote storage and processing device all in communication with each other over a wireless communications system.

United States Patent No. 6,605,038 B1, Teller et al.,

relates to a system for monitoring health, wellness and fitness using a sensor device that transmits information to a remote site over an electronic network. Data relating to an individual's physiological state, lifestyle and various contextual parameters may be monitored, stored and analyzed.

European Patent Application EP 0976360 A1, Kouji et al., relates to an event-driven communication system that remotely monitors certain conditions and reports such conditions.

Respectfully submitted,

COOPER & DUNHAM LLP

Jay H. Maioli
